Goal 4 : Becoming a «smart metropolis»

May 2015

Launch of "Optimod' Lyon", multimodal urban GPS by Citiway : multimodal route planning and real-time forecasting information for the road network, public transport and other means of transport.

March 2019

First beta version of the new platform data.grandlyon.com : access to the data sets of the mobility players in Lyon metropolitan area such as Sytral, JCDecaux, Lyon Parc Auto (LPA), Indigo, Q-Park France, Lyon airport, Rhônexpress, etc.

September 2019

Deployment of 3G and 4G in Lyon's public transport (TCL) : a total of 44 metro and funicular stations connected.

November 2019

Dematerialization of TCL tickets via the TCL E-Ticket mobile app: only available on Android devices equipped with NFC.

December 2020

Full coverage of very high-speed broadband in the Rhône department, by Orange and SFR in order to enhance territorial interconnection.

???

Deployment of MaaS solution via the "OnlyMoov" Urban Pass : RFID key-ring integrating different public and private transport services in the territory. (TCL, Vélo'v, car parks, tolls, Citiz, ...) with a post-payment system on use.

Infography designed by **LYKO**, an expert in Mobility as a Service (MaaS), offering powerful tools to connect to mobility services worldwide.
