# Zoom on the National Access Point in France : transport.data.gouv.fr

**353** Open  
data sets

## Type of data sets

**212**

public transport networks  
covered out of 337

**2360**

carpooling  
areas

**290**

Off-street  
parking

**10 600**

Electric recharging  
stations

**16**

bike sharing  
services

**12**

Railway  
data

**6**

long-distance bus  
service

**2**

Air  
data

## Upcoming

**Bike parking**

**Free-floating vehicles**

**Road works**

**Bicycle facilities**

# A gold mine for actors multimodal and MaaS

216

Re-uses reported to date on the National  
Access Point for Transport Data

739,8 M€

Amount that open data can save  
in terms of time saved in public transport

27 M

Hours saved  
in public transport  
thanks to the open-data

47

Estimated number of applications  
created after opening the data  
of Rennes (First French network  
that has open its data)

Infography realized by **LYKO**, expert in Mobility as a Service (MaaS),  
offering powerful tools to connect to mobility services worldwide.
